- 5. Preparation of end of test report and walkthrough the report in sprint retrospective meeting.

PROJECTS

Cash Management and Payments (09/2021 - 01/2023)

- Agile project for managing the corporate business partner cash flows in the bank, we created a Cash Management service to manage the inbound and outbound cash flows through different gate ways with huge number of transactions handling ability. We are going to work along with project teams, Architect teams, Agile teams and Quality Assurance (QA) test leads to establish performance testing scope.

Attended Channel (01/2023 - Present)

- I need to develop a performance test script and run them using load runner tool to perform performance testing for various scenarios, along with the functional testing and project management team to analyze functional design and non-functional requirements and provide recommendations.

Courses

- Electronics and communication engineering

SKILLS

Selenium   Java   SQL   Agile   JIRA

Performance testing   LoadRunner   Dynatrace

API Testing Postman   Git   Rest API

Manual Testing   SAP

ACHIEVEMENTS

Inspiring Performance award (01/2022 - 11/2022)

· *Received **Inspiring Performance** award for the contribution provided in ISO changes testing in banking sector and the channels which are used for making payments.*

Fully automation of smoke test and prechecks

As part of every deployment team have to manually perform smoke tests and prechecks and conform back to release team which costing valuable time, so I am automated entire smoke test scenario which reduced the testing to half and improved the productivity of team.

CERTIFICATES

Associate Cloude Engineer from Google (11/2022 - Present)

*Primary responsibilities are **deploying applications, monitor operations, and manage enterprise solutions.***

Software testing course from Qspider Hyderabad

Where learned Manual testing and SQL
